

MIGRANT EDUCATION NIGHT

MATH & ART

CLARK'S POINT SCHOOL

Students enjoyed a variety of handmade snack treats after enjoying a night of math story telling accompanied by a felt story board and enjoying arts and crafts.

They had a number of crafts to try from a number collage of multiples of 5, the house of 4's, a sun mural to be displayed in the school, and a meter string design.

Students were warned of the #2 which was traveling around under the guise of a couple or a dividend of 6 and 3 or 10 and 5. Comic book math strips were also provided to assist students in telling time or practicing division. Some meter string designs included flowers, bunnies and hearts.
