

Fun in the sun!

Manokotak Migrant Education Family Night

Diggin Dino's! 🦖

This station gave our families the opportunity to experience being an archeologist. What was laying in the sand was a mystery! Students and families dug to find a hidden egg then used tools to chip away to find what lies within.

A is for Art! 🎨

These three stations prepared families for summer, sun, and fun. They painted sun catchers, tie dyed cool bandanas, and created cozy fleece tie pillows. What a fun way to kick off the summer!

B-I-N-G-O!

Bingo is always a hit! With this fun twist on the classic game, the students and families used spring visuals for their bingo cards!

Winner, Winner, Pizza Dinner!

STEAM NIGHT

After years of sending home family nights in a kit we were finally able to invite our migrant education families to the school to foster community engagement. We provided different STEAM related activities that included hands on, sensory exploration, and even some prizes. Excitement was blooming in the air as our first in person family night began.
