

# Around the World Literacy Night

Clark's Point January 18th 2024

In a celebration of cultures around the world

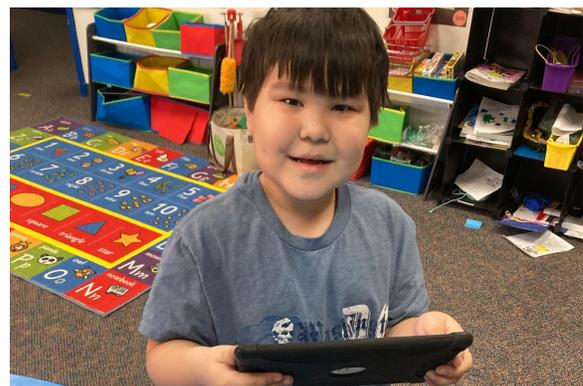

Clark's Point did an Around the World Night. Looking at countries from every continent except for Antarctica we put together a passport. The students then had to fill out the books with information found in books and on the internet, as well as look at a map to see where different countries and cities were located. Each country had the same information students needed to fill out; capital, money, holidays, food, continent.

*Two students working on their passports*

For the younger students who were still working on their writing the books were filled with different options and the students had to find the correct answers. Some of the countries included China, Vietnam, The Bahamas, Canada, France, and Great Britain. When the student finished the page in their book, they brought it to either Ms. Anna and Ms. Kelly for a passport stamp.

As students finished their passports they earned a prize and there were also door prizes for everyone who attended.

*Looking something up on the iPad about Canada*
