

MIGRANT EDUCATION NIGHT

MANOKOTAK NUNANIQ SCHOOL, JANUARY 31, 2019

A Wonderful Experience For Everyone

The first Manokotak Migrant Ed night of the 2018/2019 school year went exceptionally well with over 100 people attending. Students were engaged in fun-filled activities, including a mosaic parrot craft, heart-shaped box craft design, STEM car building activity, sight-word bingo, and STEM rocket building activity. These projects were all happening while live music was performed in the commons area with cookies.

The mosaic parrot craft was paired with the book The Parrot Tico Tango, a great story about a parrot. The students were engaged while listening to the story and learning lesson about bettering themselves.

The heart shaped box also promoted love and sharing and focused on what truly matters in life, family. The group read the book, The

Magical Love Box while designing.

In the STEM car building room, students used their imagination to create a car. The cars were powered by air. They were all different and zoomed throughout the school. The students also had an opportunity to create STEM Rockets. These rockets were powered by a pulley system and were designed to fly. This activity

was paired with the book On The Launch Pad. Student had an opportunity to engage with Science and literacy.

BINGO is always fun. Families were engaged and winning pizza as they were reading site-words.

Rob Powell entertained the group by playing music on his guitar as everyone snacked on cookies and enjoyed their night.
